Dear Michael,

I've just received the Official Results for IARU 50 MHz Contest 2008.

I'm very sorry to note that some agreements aren't respected, I explain me better, when a National Manager compiles an own classification e he sends all to the Contest Manager of the Organizer Society, this one has to take for good the classification, this for respect to the national manager and his work.

I can't accept that a Final IARU classification have some stations into it, that were disqualified by the national manager, I ask you a speech to defend all the roles of each single National Manager.

Other thing, I think that us important that each manager respect all the rules in a contest, I have seen on the final classification station with more than 10% of errors : it's a leg-pull ! If this would be done by Italians all could say that we are "Mangia-Spaghetti".

It's not admissible that we count on penalties and we don't apply them !

I disqualified more than 40 stations on last Marconi CW Contest, I know that is not so "convenient", but a Manager has a role to respect and has to take his responsibilities; I think that this Final classification don't respect national managers but also all the stations that take part in the contest respecting all the roles in compiling logs correctly; I ask for your intervention about these, and maybe to create a IARU Contest Manager reliable and serious.

Last thing : I like to ask you t remember to all managers that they don't have to accept logs by participants ; these stations, to avoid cross-checks don't send logs to their national manager but directly to organizer manager; this thing was largely discussed and have to be clear to all.

Thank you for your work and if I can help you, you have only to ask.

Best Regards and See you Soon

Ciao Claudio IV3SIX
